

Beza Tezera

Santa Monica, CA, 90405 | 3236167727 | Tezera1beza@gmail.com | [LinkedIn](#) | [Github](#) | [Website](#)

EDUCATION

University of California, Riverside | *Riverside, CA*

Bachelor of Science

Major in Computer Science

Cumulative GPA: 3.70/4.0 | Dean's List (2022-2025) | Chancellor's List (2024, 2025)

Relevant Coursework: Database Management, Artificial Intelligence, Software Engineering, Operating Systems, Algorithms, UNIX system

Certifications: Google Cloud Fundamentals, Scrum Fundamentals

Leadership: East African Student Association - **President** | National Society of Black Engineers - **Mentor** | National Society of Leadership and Success - **IT Coordinator**

TECHNICAL SKILLS

Programming: Python (pandas, NumPy, scikit-learn, NLTK, spaCy), SQL (MySQL, PostgreSQL), JavaScript, HTML/CSS

AI & LLMs: Gemini API, Prompt Engineering, NLP, Sentiment Analysis, Topic Modeling (LDA), Intent Classification, Feature Engineering

Data & Tools: Tableau, Looker Studio, Google Analytics, Google Ads, Advanced Excel, Git/GitHub, Google Cloud, Agile/Scrum

WORK EXPERIENCE

Coding Coach | *theCoderSchool, Los Angeles, CA*

April 2026 - Present

- Deliver one-on-one coding sessions for k-12 students in scratch, python, HTML, CSS and JavaScript, adapting instruction to each student's pace and learning style
- Guide students through project-based learning using a Socratic approach to foster independent problem-solving over direct instructions.
- Translate complex technical concepts clearly for non-technical audiences including students, parents, and school staff across multiple age groups and learning levels.

Data Analyst Intern | *EcoServants, Remote*

Nov. 2025 - Mar. 2026

- Built dashboard tracking KPIs and environmental impact metrics for a sustainability-focused nonprofit, supporting data-driven community engagement across distributed field sites.
- Analyzed website traffic and conversion KPIs using Google Analytics to identify friction points in the customer journey and improve user engagement.
- Evaluated Google Ads campaign performance (CTR, CPC, conversion rate) and recommended creative headline optimizations that improved ad efficiency and reduced cost-per-click.
- Designed and implemented database schema enhancements, including 2+ new SQL tables with foreign key constraints to support distributed community node architecture.

Research Assistant Intern | *UCLA, Los Angeles, CA*

June 2024 - Aug. 2024

- Applied machine learning techniques (e.g., K-Means clustering) to analyze drug phenotype pathways and generate binary feature matrices for pattern recognition.
- Managed and analyzed 100,000+ record datasets using Python and SQL to build structured pipelines and ensure data integrity and reproducible insights.
- Built interactive Tableau dashboards, saving 10+ hours per week of manual reporting by enabling interactive and reproducible analytics for research staff.
- Performed quality assurance reviews including data validation, cleaning and control procedures, improving data accuracy by 15% for downstream analysis.
- Built and documented SOPs for data collection and quality control processes, ensuring compliance with research standards and maintaining clear stakeholder documentation.

PROJECTS

Job Legitimacy Checker | *React, Gemini API, JavaScript*

- Built an AI-powered tool that scores job posting legitimacy 1–10 and flags suspicious signals, protecting job seekers from fraudulent postings.
- Integrated Gemini API for natural language reasoning over unstructured job posting text, engineering prompts to extract structured risk signals from free-form descriptions.
- Designed a clean React interface enabling non-technical users to paste any job posting and receive an instant, detailed legitimacy breakdown.

Amazon Customer Review & Sentiment Analysis | *Python, NLP*

- Developed end-to-end machine learning pipeline to predict customer ratings with 77% accuracy using supervised learning (regression models) and VADER sentiment analysis on 1,000+ text reviews.
- Implemented unsupervised learning (LDA topic modeling) to discover 5 distinct customer discussion themes and performed aspect-based sentiment extraction across 7 product dimensions.
